

Attending Physician's Questionnaire

Claim for Disability Insurance

Policy No. 12500-G

Please complete this form based on your patient's current medical condition. The information you provide will assist Sun Life Assurance Company of Canada (Sun Life) to understand your patient's condition, treatment, prognosis and potential for recovery. Thank you for your time and cooperation.

Please note that any reference to Attending Physician (doctor) also refers to Licensed Physician or Nurse Practitioner.

NOTE: There are three Questionnaire's included in your patient's Disability Insurance (DI) package – Mental Health, Musculoskeletal and one for other conditions. Only one form needs to be completed. Please choose the form most appropriate for your patient's condition. Your patient is responsible for any cost associated with the completion of this form.

Progressive load increase and grip strengthening under supervision.

5 Prognosis and recovery

Sun Life encourages rehabilitation assistance, modified work or light duties to return an employee to the workplace as soon as medically possible. Based on the information you have provided we will review your patient's rehabilitation potential.

What return-to-work goals have been discussed with your patient? Please explain.

Phase 1 (Modified duties): 15-01-2026 @ desk-based tasks, no lifting > 2 kg, ergonomic input, frequent breaks.

Phase 2 (Expanded duties): 05-02-2026 @ gradual reintroduction of light manual tasks as tolerated.

Please provide your patient's prognosis for improvement.

Fracture union expected: 6-8 weeks from injury with proper immobilization.

Functional recovery: 8-12 weeks with physiotherapy; residual stiffness may persist short term but expected to resolve.

Please provide any other information that will help us understand your patient's current condition, recovery goals and prognosis.

Patient educated on cast care, elevation, and signs of complications (increasing pain, numbness, compartment symptoms).

Radiographic monitoring scheduled; escalation to surgery only if malunion/non-union develops (not currently indicated).

Encouraged early return to modified work to prevent deconditioning and support recovery.
